RE: Reference Letter for BAMACO INC.

To whom it may concern,

The City of Del City selected BAMACO Inc. from 20 companies responding to request for proposal to remove vegetative debris that resulted from an ice storm in December 2007.

BAMACO mobilized quickly and communicated with the City and the residents to expeditiously remove over 8,000 tons of debris. BAMACO was able to establish truck scales and an operational center in a very short time.

The City of Del City was pleased with the performance of this company and would recommend them for future debris clean up projects.

The project manager for BAMACO during this clean up was Mr. Pete Gonzalez.

If additional information is needed regarding this project, please contact Mr. Bill Graham, Del City Public Director, 405-671-2874.

Respectfully,

Mark Edwards
City Manager
City of Del City
